

REJOINDER

In response to the news item against traffic police posted on Hitech Web Channel and circulated in social media, it is to inform that the said news item is not factual and far from the truth. The correct facts are as follows.

On 10th May traffic home guard M Heera Lal, working with Nampally Traffic Police station was performing duty at Yousufian Dargah [Junction.at](#) about 08:15 p.m. Two unknown persons on a bike on wrong side from May Rose café towards Dargah. The home guard tried to take the picture of the violation using digital camera. But the rider of the said two wheeler obstructed him and started arguing with him. When the said home guard explained him about the traffic violation, the man suddenly punched the Home Guard on his face resulting in bleeding injury to his tongue.

However the traffic Sub-Inspector Mr. Satya Naryana reached the spot and segregated them from the mob and asked them to wait in shop and was clearing the traffic jam caused due to the incident. But the said attacker fled away from the place by pushing the home guard. On enquiry with the local businessmen, the man was identified as Mohd Imran S/o Mohd Baqhar and on the complaint of home guard a case was registered U/s 332 IPC at Nampally Police station and the home guard was sent to Osmania General Hospital for treatment. Where the doctors administered injection and three sutures to the tongue of the home guard as it had deep cut wound.

While the police was searching for the above said Imran approached Hitech Web media persons by trimming his hair and gave a false statement against the traffic police saying they the police attacked him. It is false, the traffic police only caught him when he tried to escape after violating traffic laws and attacking the police home guard who was performing duty.

Hence we request you all to carry the correct version of the incident and not to believe and circulate and publish the wrong version of the incident as is being told by Imran.

Dy.Commissioner of Police,

Traffic-II, Hyderabad.
